

# WB-16B-38-400

These clear PET (Polyethylene Terephthalate) square bottles are a popular choice in the beverage industry, but can be used for a variety of products. With a standard 38-400 neck finish, these bottles are easy to fill with any non-carbonated beverages, sauces, candy, popcorn, soup mixes, or dry goods and provide a high product visibility. These French square bottles are lightweight, and take up less space than round bottles on the shelf. Top them off with our flip or flat cap. The caps with pressure activated adhesives are not recommended for use with liquid products and are not considered tamper evident without adding a shrink band. These bottles are BPA free, FDA approved, and proudly made in the U.S.A.

**NOTE:** We advise you to test your product with the packaging to ensure product and volume compatibility.
